Message from the Director

We at Kalinga Eye Hospital pledge to meet the patients' requirements by offering expert ophthalmic care with compassion through a committed professional team; patient safety and well-being shall always be our top priority. We shall strive for continuous quality improvement and comply with international standards to implement quality systems. We commit to provide equitable and efficient eye care to all sections of society, thus restoring sights over 10,000 people a year at No cost through surgical interventions and to reach to more people who are un-served with eye care, this year Kalinga Eye Hospital has empowered the forest animators to identify people with eye problems in the forest areas of our state.

To continue to help the state of Odisha reduce avoidable blindness a lot of initiatives are yet to be taken, however to enact them your support is needed. So please log onto our website and become part of the team by donating your money or time to Kalinga Eye Hospital.

Sarangadhar Samal

Kalinga Eye Hospital Annual Action Plan for the year 2014

- ✓ 12000 adult & 200 child eye surgeries to be conducted at No cost to the patients.
- ✓ 200 Out reach comprehensive eye screening camp to be conducted
- ✓ Introduction of mobile eye clinic with tele-ophthalmology facility.
- ✓ Five fixed community eye treatment Center (Vision Center) to be developed.
- ✓ Setting Low Vision & Glaucoma Clinic at the Base Hospital
- ✓ 400 community workers and 100 school teachers to be empowered on detection of common eye problems amongst the community.
- ✓ Introduction of Diploma in Ophthalmic Technician course.
- ✓ Setting the Management Information System (MIS) and Electronic Medical Record at Kalinga Eye Hospital.

Vision:

KEH works to promote quality of life in rural communities through providing affordable eye care services on a sustainable basis.

Mission:

To be a centre of excellence in eye care research, training, prevention and care; to reduce avoidable blindness by providing continual quality services to all those in need; to offer advanced, affordable total eye care services under one roof accessible to all communities; to promote community awareness and education on eye care.

Empowering the Forest Community to Detect Eye Problems

In the second phase of training of Vision Technicians, 789 people were trained to carry out vision exams on their entire villages. The Odisha Forestry Sector Development Project has worked together with Kalinga Eye Hospital to train a member from each village and provide him or her with a kit to screen for eye diseases and problems. After an Animator has screened the entire population of his or her village, a doctor travels to a central location and sees patients from several villages that the Animators have identified as having eye problems. 796 people were trained in round one of the project, and a total of 1,585 Animators, para teachers, were trained on detecting common ophthalmic ailments in the community.

From Forest Guards to Vision Guardians

In support with the Odisha Forestry Sector Development Project (OFSDP) Odisha, KEH decided to empower the Animators from different forest ranges to detect the common eye problems amongst the community and in this regard, after training these animators have screened the general population of their villages and identified the people are in need of eye care treatment. Amongst all Keonjhar district has conducted the Eye camps at first and 5 eye treatment camps were conducted in five strategic locations of the district through which 2463 people were screened, 1561 were provided with ophthalmic medicines, 978 were provided with refractive corrected glasses and 370 have undergone cataract eye surgery. Without this initiative 2463 people of the dense forest areas of our state would not have accessed the eye care and might remain with eye problems.

Dr. Asim Kumar Sil Vision 2020 India addressing the gathering

Inauguration of KEH's Angul unit

Kalinga Eye Hospital's newest ophthalmic center in Angul was dedicated to the people of Odisha on December 8th, 2013. The event's chief speaker was Dr. Asim Kumar Sil, Board member to Vision 2020 Right to Sight India, and CMD of VMANN, and Sri Vinod Kumar, PCCF-KL, PD-Odisha Forestry Sector Development Project also addressed the gathering. Local doctors, corporate houses, Pharmacists, patho labs were invited to come tour the center, and a plaque dedicating the clinic to the people of Odisha was unveiled inside the clinic.

Involving the Community ASHA Workers

To reduce avoidable blindness, Kalinga Eye Hospital has involved the community workers of Accredited Social Health Activists (ASHAs). Workers instituted by the Government of India's Ministry of Health and Family Welfare (MoHFW) as part of the National Rural Health Mission (NRHM),

have helped Kalinga Eye Hospital to detect more than 611 cataract cases in Keonjhar & Kendrapara districts of our state and out of them 497 have undergone the sight restoration surgery.

Making Eye Care Accessible

After faithfully serving the people in and around Dhenkanal district for over 10 years, it has been decided that the time has come to expand the ophthalmic services to serve more people throughout Odisha, and instead of extending towards the coastal Odisha, Kalinga Eye Hospital has desired to move towards the western part of Odisha and on 1st February 2013, it has opened its new location in Angul with a goal of developing the center to a secondary eye care center by 2015 that will reduce avoidable blindness in the state.

Eye Screening Camp for Differently able Children

The Rotary Club of Bhubaneswar Heritage sponsored an eye screening camp for differently able children at the Chetna Campus in Bhubaneswar on January 11th, 2013 where Kalinga Eye Hospital provided the medical assistance for the eye treatment. The camp screened 136 children, and 11 were provided with refractive corrective spectacles. Many differently able children have multiple health concerns, including sight impairment. Providing eye care can help a child become more independent and can help him or her do better in school.

Helping to Restore Sight

There are some non-profit global health delivery organizations that have joined with Kalinga Eye Hospital in restoring the sight of people in need. Some of them like Unite for Sight, SEVA Foundation, and DIK Germany partner with KEH to provide comprehensive ophthalmic care and education about preventative measures through conducting outreach eye treatment camps. Many patients in Odisha cannot access eye care

comprehensive ophthalmic care and education about preventative measures through conducting outreach eye treatment camps. Many patients in Odisha cannot access eye care because of a variety of reasons, such as lack awareness or transportation, loss of wages, or lack of need. To work around these barriers to care, outreach camps were designed to help patients restore their sight. Outreach camps are conducted in a radius of about seven hours from

the clinic in the local villages to minimize the patient travelling. Patients from these camps who need surgery are transported back to the hospital for treatment and once surgery is done, patients are counseled about the postoperative care and are dropped back at their respective villages and regularly provided with follow up care by our outreach teams. This year, 6094 patients were provided with free sight-restoring cataract surgery, supported by these International NGOs.

Eye Screening camp at the OFSDP Office:

A screening was held on August 9th, 2013, at the Odisha Forestry Sector Development Project's (OFSDP) office, which was attended by PCCF of Kenduleaf and P.D. of OFSDP Sri Vinod Kumar. Animators have also shared their experiences of becoming a guard of vision. After remarks to the crowd, Animators from several (villages) who had been trained to screen patients through Kalinga Eye Hospital's Vision Technician Training program screened workers. This allowed forestry department officials to see the results of the training, and also allowed Animators to screen 78 patients and provide 44 with medicine.

Eye Camp with Dibya Jiban Sangha

With the help of Dibya Jiban Sangha, Angul, an eye treatment camp was conducted at Podapada High School in Angul on October 20th, 2013 where 497 people were screened. Out of these 497 people, 201 were identified as having cataracts, and 175 of these people opted to have surgery at KEH. In addition, 91 people were provided with refractive corrective glasses and 277 were provided with medicine.

Eye Treatment Camp With MPCL, Angul

Monnet Power Company Limited sponsored an eye camp on November 14, 2013 to honor Children's Day. The camp worked to spread the principles of the day, such as good practices to promote eye health, child eye health and proper screenings. AGM-CSR Harmeet Sehra was present at the camp, and spoke briefly to those who had arrived to be screened. In total, 307 people were screened, 87 were provided with medicine, 61 with refractive corrected glasses, and eight people with cataracts were counseled to undergo sight restoration surgery at Kalinga Eye Hospital. MPCL financed the surgery as part of their corporate social responsibility plan.

Eye Camp with Rungta Mines

Being a socially responsible corporation, Rungta Mines has conducted an eye treatment camp at Galpada U.P school, on 23/3/2013 and Jhadabandha U.P School on 24/3/2013. Collectively, 461 people were screened, 287 were provided with ophthalmic medicines, 113 were provided with refractive corrected glasses and 68 underwent cataract eye surgery.

Volunteering at Kalinga Eye Hospital.

Volunteers from diverse backgrounds, professional photographers, medical students, undergraduates, and professionals from all over the world come visit Kalinga Eye Hospital to extend their support in the field of community ophthalmology. This opportunity is a unique chance for volunteers to explore Odisha while learning about the barriers to healthcare in the region, all while lodging at KEH along with the paramedic staff members, which allows them to become fully immersed in the life of the hospital. This year, 11 volunteers have joined hand with KEH on a variety of activities.

Support Kalinga Eye Hospital

Just take a moment to close your eyes and walk around. How do you feel? Helpless? Disoriented? In India, blindness poses a critical health issue and the majority of people's blindness is due to cataract, which is easily reversible with surgery. Blindness can impair people's productivity and puts tremendous amount of emotional and economic burden on their families. Research has shown that blindness also reduces people's lifespan. Often

the barrier that prevents people from obtaining cataract surgery is a transportation or money issue. At KEH, Dhenkanal we provide over 10,000 surgeries a year for free to patients. It has outreach camps in rural areas of central Odisha to give people routine eye care check ups. In addition, KEH

identifies people with cataract and ferries them to and from the hospital for surgery. To follow up with our patients and other outreach patients, KEH staff visit the same location 3 to 4 months later.

Make a donation or donate your time to KEH to help eliminate unnecessary blindness.
